DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 13-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Lemke et al. (J. Agri. & Food Chem., vol. 46(9), pages 3789-96).

Lemke et al. teaches acidic montmorillonite clays modified via exchange with ammonium and pyridinium organic cations, exchanged to more than about 75%. It was found that ZEN (mycotoxin) was adsorbed the greatest when the clay had been modified by exchange with cations possessing C-16 alkyl chains and exchanged to more than about 75%.

Allowance of claims

2. Claims 35-39 are allowable over art of record. The Lemke et al. reference teaches away from the claims and states that the addition of modified clays to animal feed to bind the mycotoxins therein would be ineffective. See page 3795, second col.
